Dashboard

This dashboard shows data on individuals who are under custody of New York State Department of Corrections and Community Supervision (DOCCS) prison facilities. Data is uploaded from DOCCS's systems monthly.

For more reports on DOCCS's population, please see:

<https://doccs.ny.gov/research-and-reports>

For questions on the dashboard not answered in this document, please contact NYS DOCCS.

Notes

Please note that data labelled May 1, 2024 was actually generated May 4, 2024.

Individuals labelled with “Not Coded” for some dimensions (such as crime group) are primarily individuals who haven’t yet completed the coding process. Those are generally resolved within 1 month.

If the label at the top of a chart is listing out all of the individual facilities instead of “Facilities: ALL”, click on Reset Filters from the Filter menu.

Clicking Chart-Level Download exports the currently displayed chart as a CSV with your active filters applied. For example, if you're viewing ‘Population By Facility’ with one facility selected , the CSV will contain data for that facility only.

Clicking Individual-Level Download exports monthly individual-level CSV(s) for either the selected time range or for the full 5 year period. Chart filters are not applied to this download.

Chart: Prison population over time

The chart describes the historical incarceration population over the selected "Time Period." Each data point represents the total population for the selected group on the first day of that month. For example, hovering over the "November 2020" data point on the chart will show the total number of people described in the section above on November 1, 2020.

Chart: Prison population by facility

The chart describes the number of people in each facility as of the date specified in the chart title.

Chart: Prison population by race

The chart describes the number of people by race as of the date specified in the chart title.

Chart: Prison population by gender

The chart describes the number of people by gender as of the date specified in the chart title.

Chart: Prison population by sex

The chart describes the number of people by sex as of the date specified in the chart title.

Chart: Prison population by age group

The chart describes the number of people from each age group as of the date specified in the chart title.

Chart: Prison population by ethnic status

The chart describes the number of people by ethnicity as of the date specified in the chart title.

Chart: Prison population by minimum sentence (months)

The chart describes the number of people from each minimum sentence (months) as of the date specified in the chart title. Sentence length represents aggregate sentence, taking into account the sentences for all crimes of conviction.

Chart: Prison population by maximum sentence (months)

The chart describes the number of people from each maximum sentence (months) as of the date specified in the chart title. Sentence length represents aggregate sentence, taking into account the sentences for all crimes of conviction.

Chart: Prison population by conviction county

The chart describes the number of people from each county of conviction as of the date specified in the chart title.

Chart: Prison population by crime group

The chart describes the number of people from each crime group as of the date specified in the chart title.

Chart: Prison population by specific crime

The chart describes the number of people from each specific crime as of the date specified in the chart title.

Chart: Prison population by admission type

The chart describes the number of people from each admission type as of the date specified in the chart title.

- JS Admission = Judicially Sanctioned by the court to participate in a drug treatment program at DOCCS. These individuals are admitted to DOCCS facilities and are also under parole supervision.
- PDP Admission = Admitted to DOCCS to participate in a Parole Diversion Program as the result of a parole violation. These individuals are admitted to DOCCS facilities and are also under parole supervision. This program was discontinued in 2022.
- No New Term PV = Returned to DOCCS custody for violating the conditions of parole in an important respect.
- New Term PV = Admitted to DOCCS for a new conviction that occurred while they were on parole supervision.

Chart: Prison population by religion

The chart describes the number of people from each religion as of the date specified in the chart title.

- The vast majority (~95%) of individuals labeled with Not Specified/Unknown on the Religion dashboard fall into the Not Specified category, meaning they did not provide a religious affiliation when asked. The remaining individuals, who fall into the Unknown category, are nearly all newly admitted to the Department and have not yet had all of their information entered on the computer system.

Chart: Prison population by marital status

The chart describes the number of people from each marital status as of the date specified in the chart title.

Chart: Prison population by time at housing facility

The chart describes the number of people from each time at each housing facility as of the date specified in the chart title.
